5. **Paraphrase the following :**

The koala is a gentle little animal. It is almost defenceless. Only its colour protects it from enemies. The koala makes no nest. It just sits in the forked branches of a tree. Unlike a bird, it cannot balance itself with its tail—because it has no tail. It likes gum trees the best because it loves entirely on the leaves of the tree. Sometimes the supply of its special diet is used up. The koala, rather than seek food elsewhere, will stay in its own area and starve to death.

6. **Analyse the following :**

The formation of the Himalayas influences the climate in various ways. These act as hornets protecting the great plains of India from the cold winds of central Asia during severe winter. The Himalayas are the reason for summer rains and monsoon type climate in regions that are beyond the Western Ghats of India. In its absence, this region would have remained drier. The Himalayan Rivers have a perennial flow since these are fed by the glaciers and bring a fat of silt, making these plains very fertile.
